

Recenzentski postupak u biomedicini

Prof. Srećko Gajović
Croatian Medical Journal

23 godine

**YOUR DOOR TO THE MAINSTREAM
MEDICAL SCIENCE**

Značajke Croatian Medical Journal-a

**CMJ is an
international,
peer-reviewed,
bimonthly,
Open Access Journal**

**CMJ is published in
English**

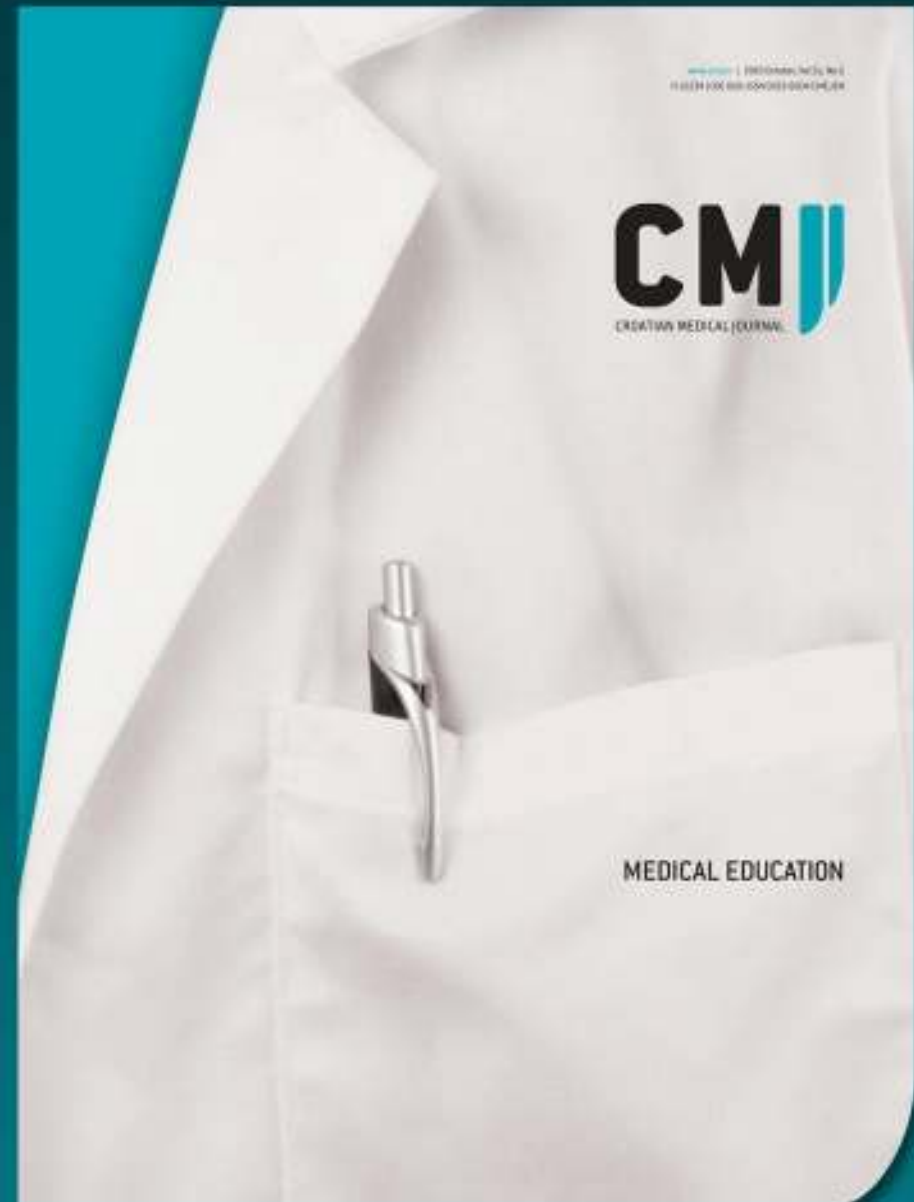

**CMJ is indexed in
PubMed/MEDLINE,
PubMed Central,
EMBASE/Excerpta
Medica, Current
Contents/Clinical
Medicine, and Web of
Science**

**Our impact factor is
1.373**

„author-helpful
policy”

CMJ checks
regularly for
plagiarism by
specially
dedicated
software:

CrossCheck

CMJ organisation

- **Owners:**

University Schools of Medicine from
Zagreb, Rijeka, Split and Osijek

4 Schools correspond to 4 strongest
Universities in Croatia (all that have
medical studies)

- Represented by Dean's Conference
- Regulated through MoU among 4 partners

CMJ organisation

- Management Board:
 - 8 members:
 - 4 from Zagreb, 2 from Rijeka,
 - 1 from Osijek, and 1 from Split

CMJ organisation

- Editorial Board:
 - 8 members:
 - 4 from Zagreb, 2 from Rijeka,
 - 1 from Osijek, and 1 from Split

CMJ organisation

- Management Editors:
 - 3 employees
 - Publication Editor
 - Language Editor
 - Journal Secretary
 - Flexible number of professional volunteers
 - e.g. Manuscript Editors, Statistical Editors

CMJ organisation

- Publisher:
Medicinska naklada, Zagreb, Croatia

CMJ Diamond Open Access includes

- No publication charges
- No manuscript charges
- Inclusion in major medical databases
- Free access directly from the databases
 - e.g. **PubMed**,
NIH based database which is central for
medical publications

Recenzija u CMJ

- Obavezna
- Jednosmjerno slijepa
- Nema nekih specifičnih uputa

Recenzenti u CMJ

- Bar 2 recenzenta
- Statistička recenzija

Rezultati recenzije

- Veliki broj recenzenata ne odgovara na poziv na recenziju
- Značajan broj recenzija nije koristan
- Iznimno teško je skupiti dovoljan broj kvalitetnih recenzija u razumno kratkom roku

Primjer recenzije

I have only minor comments:

1. Interesting paper.
2. The text is quite difficult to follow; however, the tables show the findings nicely.
3. Some text structuring would help, perhaps.
4. Regarding the findings, have you collected information on obesity? It seems possible that vitamin D deficiency could be a consequence of higher BMI/waist circumference in older patients with longer duration of the disease.

O čemu ovisi prihvaćanje rada
za publikaciju?

ili

Koja recenzija je dobra?

- Novina u znanosti i struci
- Opravdan i dobro proveden dizajn pokusa
- Rezultati korektno obrađeni i prezentirani na pravi način
- Stil rada pregledan i razumljiv, u skladu sa zahtjevima časopisa

Primjer recenzije

I have only minor comments:

1. Interesting paper.
2. The text is quite difficult to follow; however, the tables show the findings nicely.
3. Some text structuring would help, perhaps.
4. Regarding the findings, have you collected information on obesity? It seems possible that vitamin D deficiency could be a consequence of higher BMI/waist circumference in older patients with longer duration of the disease.

O čemu NE ovisi prihvaćanje
rada za publikaciju?

Ali ipak

Koja recenzija je dobra?

- Jasno opisati autorima što je nužno popraviti
- Jasno dati razloge zašto rad ne zadovoljava standarde pojedinog časopisa
- Pomoći autorima u budućnosti

Primjer recenzije

I have only minor comments:

1. Interesting paper.
2. The text is quite difficult to follow; however, the tables show the findings nicely.
3. Some text structuring would help, perhaps.
4. Regarding the findings, have you collected information on obesity? It seems possible that vitamin D deficiency could be a consequence of higher BMI/waist circumference in older patients with longer duration of the disease.

Odgovor autora

- Po točkama
- Opisan u popratnom pismu (cover letter).
- Odnosi se na preinake u radu.

Kako nadopuniti sustav recenzije?

- Trijaža
 - Brza,
 - Efikasna
 - Bez jasne povratne informacije autorima
 - Oko 2/3 radova odbija se u postupku trijaže

Zašto moramo nadopuniti sustav recenzije?

- Copyediting
- Jezično uređivanje
- Produkcijsko uređivanje
- Probni otisak

Tko snosi konačnu odgovornost?

- Recenzenti?
- Glavni urednik?
- Autori?

Klasični sustav recenzije ili alternative?

- CMJ ostaje u klasičnom sustavu – do daljnjega
- Neke alternative:
 - Bez recenzije
 - Post recenzije

Why CMJ will continue to be
Croatian Medical Journal?

Zbog recenzenata 😊

- Hrvatska medicinska zajednica zalog je kvalitete Croatian Medical Journal-a
- Kako poboljšati recenzije u CMJ?

100 CMJ Key Reviewers

- Prepoznati najbolje recenzente
- Nagraditi ih javnim vrednovanjem njihovog doprinosa

Budućnost recenzije

- Plaćeni rad
- Digitalne baze recenzenata
- Javne recenzije – javni sadržaj recenzije, proces recenziranja i ime recenzenata (ali samo za prihvaćene radove)

Quality of journal

- Only citations count – IF

Quality of scientist

- Only citations count – h-index

But...

At the end

- Recenzija ima brojnih nedostataka no za sada nema ozbiljne alternative
